Equitable Life® is proud to be one of Canada’s largest mutual life insurance companies. We are owned by our participating policyholders, not shareholders. This allows us to focus on management strategies that foster prudent long-term growth, continuity and stability.

We are dedicated to meeting our commitments to our customers – to provide good value and meet their needs for insurance protection and wealth accumulation – now and in the future. That’s why Canadians have turned to Equitable Life since 1920 to protect what matters most.

Equitable Life is a focused, stable and strong company. We have sufficient earnings and capital to meet our future growth targets, and we continue to grow steadily. Our growth in sales has been driven by our ability to implement our strategic plan, placing a priority on products, service and execution. Our financial success reflects our continued commitment to profitable growth and our ability to navigate a changing regulatory and economic environment.

Our mutual structure is a key element of our value proposition, along with our diversified product portfolio and superior service. As an organization we’re progressive, competitive and firmly committed to serving the best interests of our policyholders, through longer-term strategies that foster ongoing stability, growth and profitability.

This guide provides you with an overview of how common medical and non-medical conditions impact the underwriting on Equitable Life individual insurance products, through four categories of information:

<table>
<thead>
<tr>
<th>CONDITION DESCRIPTIONS</th>
<th>IMPORTANT FACTORS</th>
<th>LIKELY DECISION</th>
<th>UNDERWRITING INFORMATION REQUIREMENTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Provides a basic background on each condition.</td>
<td>• Details key elements affecting the underwriting decision.</td>
<td>• Provides an indication of the likely underwriting decision for a specific condition and does not guarantee that an offer can be made. Actual decisions will be based on assessment of all sources of information as required for each applicant and his or her individual condition(s).</td>
<td>• Details the information that may be obtained for medical conditions, such as an Attending Physician’s Statement (APS), and provided by the applicant for non-medical conditions. If this information is not provided or is incomplete, subsequent reports may be required and may delay the underwriting decision.</td>
</tr>
</tbody>
</table>

Further to the information on medical and non-medical conditions, the guide also includes the Evidence of insurability schedule, Financial underwriting guidelines, Recent immigrant and temporary resident guidelines, Preferred underwriting classifications, Smoking status information for each product, and information about Equitable Life’s Stop Smoking Incentive Program.
HELPFUL INFORMATION TO GATHER FOR ALL MEDICAL CONDITIONS

1. Date of diagnosis
2. Age of applicant at date of diagnosis
3. Medications, dosages and related treatments prescribed
4. Any time off work
5. Any hospitalizations
6. Contact information including full name, address and telephone numbers for medical professionals involved in diagnosis and treatment
7. Date and results of last medical follow-up and/or medical tests
8. Any pending tests or investigations
9. Current smoking status
10. Date and details of the last occurrence of symptoms/episodes/flare-ups

Importance of complete information

Providing complete information on your client’s medical and non-medical conditions helps ensure an accurate assessment as quickly and efficiently as possible. Where questionnaires are required, they must be completed in full and signed by the applicant. Available questionnaires include:

- Drinking Habits
- Respiratory
- Climbing
- Scuba Diving
- Drug Use
- Aviation
- Foreign Travel
- Parachuting
- Nervous Disorders
- Motor Sports
- Financial

TRIAL APPLICATIONS

Trial applications may be submitted on a preliminary basis to determine eligibility before arranging the underwriting of medical evidence. When submitting a trial application, note “trial application” in the Special Instructions section of the application, and provide full contact information including name, address and telephone number for the attending physician.

UNDERWRITING DECISIONS

Underwriting will either accept, decline or postpone a decision. If your client’s application is:

- **ACCEPTED**, an offer of insurance is being made at either a standard or substandard risk classification. Sub-standard risk (sometimes referred to as a “special class” risk) can result in a rating that will increase the premiums by a multiple ranging from 150% to 350%.
- **DECLINED**, the applicant has been deemed uninsurable and no offer of insurance is being made.
- **POSTPONED**, an offer of insurance may be considered for the applicant at a future date.

QUESTIONS?

For more information, contact your Equitable Life Regional Sales Manager.
### Alcohol Use/Abuse

**Condition Description:** Alcohol consumption considered as history of or present alcohol abuse, dependence, at risk and heavy use.

**Important Factors:**
- Current age
- Amount of alcohol declared
- Any diagnosis of abuse or dependence
- How long abstinent or moderate consumption
- Any relapses
- Member of alcohol self-help group
- Treatment with medication

**Likely Decision:** Ratings dependent on:
- Age
- Time since last use
- Co-morbid factors

**Following Five years of recovery:**
- Standard or substandard rates considered

**Recovery of less than five years:**
- Considered on an individual basis

**Note:** Alcohol use in combination with a diagnosis of alcoholism or alcohol dependence is declined.

**Required:**
- Drinking Habits Questionnaire
- APS
- MVR
- Blood profile

**Helpful:**
- Details of any favourable aspects such as continued employment, attendance at self-help group, total abstinence, no relapses
- Details of related treatment in a hospital or rehabilitation facility
- Results of any testing related to liver function or cardiac disease
- Contact information including full name, address and telephone numbers for medical professionals involved in diagnosis and treatment
- Medications, dosages and related treatments prescribed
- Date and results of last medical follow-up

### Alzheimer’s Disease

**Condition Description:** Alzheimer’s-type dementia is a disease of older people and prevalence increases with age. This disease has a severe loss of intellectual function. The dementia is severe and progressive. The earliest symptoms are a failure of memory, especially for recent events, and decreasing efficiency at work or home.

**Important Factors:**
- Type of Anaemia
- Cause of the Anaemia, if known
- Details of all testing done and any referrals to specialists (to include dates, names of tests and names of specialists seen)
- Blood test results
- Current and past treatment
- Type of medication previously and currently taking
- Any coexisting impairment

**Likely Decision:**
- Preferences for preferred, preferred plus; standard to decline

**Underwriting Information Requirements:**
- Standards usually available

**Helpful:**
- Type and cause of Anaemia
- Contact information including full name, address and telephone numbers for medical professionals involved in diagnosis and treatment
- Medications, dosages and related treatments prescribed
- Details of ongoing surveillance of the condition, e.g. blood tests
- Date and results of last medical follow-up

### Anaemia

**Condition Description:** Iron deficiency anaemia is the most common type and is defined as a reduction in the red blood cells (RBCs) in the blood. Anaemia is sometimes due to blood loss, failure of the bone marrow to produce sufficient cells, or premature destruction of cells.

**Important Factors:**
- Type of Anaemia
- Cause of the Anaemia, if known
- Details of all testing done and any referrals to specialists (to include dates, names of tests and names of specialists seen)
- Blood test results
- Current and past treatment
- Type of medication previously and currently taking
- Any coexisting impairment

**Likely Decision:**
- Preferences for preferred, preferred plus; standard to decline

**Underwriting Information Requirements:**
- Standards usually available

**Helpful:**
- Type and cause of Anaemia
- Contact information including full name, address and telephone numbers for medical professionals involved in diagnosis and treatment
- Medications, dosages and related treatments prescribed
- Details of ongoing surveillance of the condition, e.g. blood tests
- Date and results of last medical follow-up
## Aneurysm

Disorders of the aorta include bulges (aneurysms) in weak areas of its walls and separation of the layers of its wall (dissection). These disorders can be immediately fatal, but they usually take years to develop. Aneurysms may also develop in other arteries.

**Condition Descriptions**
- Type and location of aneurysm
- Date occurred
- Cause of the aneurysm
- Size and stability of the aneurysm
- Present condition
- Blood pressure control
- Any history of smoking
- Any current treatment

**Likely Decision**
- Six months after surgery:
  - Considered on an individual basis
- Small Abdominal Aneurysm with no surgery; size of five cm or less has been maintained for last three years or since diagnosis (if shorter period); stable with regular follow-up:
  - 1.50 – 200%
- Large Abdominal Aneurysm with no surgery, five cm or more:
  - Decline
- Abdominal Aneurysm with surgery, minimum of six months post:
  - 1.50 – 250%
- Small Cerebral Aneurysm with no surgery, size of one cm, minimum of six months post diagnosis:
  - Rating determined based on history of aneurysm
- Large Cerebral Aneurysm, no surgery, size of 1.9 cm or more:
  - Decline
- Cerebral Aneurysm with surgery (six months to two years post):
  - Typically substandard rating, if no complications may be considered standard

**Underwriting Information Requirements**
- Required:
  - APS
  - Paramedical
- Helpful:
  - Type, cause and size of the Aneurysm
  - Date of diagnosis
  - Contact information including full name, address and telephone numbers for medical professionals involved in diagnosis and treatment
  - Medications, dosages and related treatments prescribed
  - Details of ongoing surveillance tests
  - Details of lifestyle modifications
  - Details on past and present smoking habits
  - Details of lipid and blood pressure control
  - Date and results of last medical follow-up

---

## Angina Pectoris

Angina, also called Angina Pectoris, is temporary chest pain or a sensation of pressure that occurs while the heart muscle is not receiving enough oxygen.

**Condition Descriptions**
- Refer to Coronary Artery Disease (CAD)

**Likely Decision**
- Postpone until six months after initial treatment, then submit trial application.

                         • Standard  
                         Moderate, no present complications, ongoing treatment:  
                         • 150 to 175%  
                         No ongoing treatment:  
                         • Age 64 and younger: 175% to decline  
                         • Age 65 and older: 150% to decline  
                         Severe, ongoing treatment:  
                         • 150% to decline  
                         Severe, no ongoing treatment:  
                         • Decline  | Requirements:  
                         • APS  
                         Helpful:  
                         • Dates and results of all sleep studies  
                         • Type and severity of the Apnea  
                         • Medications, dosages and related treatments prescribed, and compliance  
                         • Lifestyle modifications prescribed (current and previous)  
                         • Details of time off work due to this condition  
                         • Smoking status, past and present  
                         • Date and results of last medical follow-up  |
| **Arteriosclerosis**    | Refer to:  
                         • Coronary Artery Disease (CAD)  
                         • Stroke  
                         • Transient Ischemic Attack (TIA)  | Postpone until six months after initial treatment; then submit trial application. |

**Anxiety**

Anxiety disorders involve a state of distressing, chronic but fluctuating nervousness that is inappropriately severe for the person’s circumstances.

**Apnea/Sleep Apnea/Obstructive Sleep Apnea (OSA)**

Sleep Apnea is a serious disorder in which breathing repeatedly stops long enough to disrupt sleep and temporarily decrease the amount of oxygen and increase the amount of carbon dioxide in the blood.

**Arteriosclerosis**

Arteriosclerosis is a condition in which patchy deposits of fatty material develop in the walls of medium-sized and large arteries, leading to reduced or blocked blood flow.

*Smoking with Asthma may increase ratings.*
# Atherosclerosis

Atherosclerosis is a specific type of arteriosclerosis, but the terms are often used interchangeably. Atherosclerosis refers to the buildup of fats in and on the artery walls (plaques), which can restrict blood flow. These plaques can also burst, causing a blood clot.

- Refer to Coronary Artery Disease (CAD)

## Atrial Fibrillation/Atrial Flutter

Atrial Fibrillation and Atrial Flutter are very fast electrical discharge patterns that make the atria contract very rapidly, with some of the electrical impulses reaching the ventricles and causing them to contract faster and less efficiently than normal.

- Current Age
- Date Atrial Fibrillation/Atrial Flutter was diagnosed, and the age of client when condition first began
- Number of times this occurs
- Type of investigations/treatment
- Any coexisting conditions/heart disease
- Chronic or paroxysmal

### Ratings dependent on:
- Age
- Severity
- Frequency

### Condition recently found:
- Postpone or decline

### Good control — less than four attacks per year, no underlying conditions, age 60 and under:
- Standard to 150%

### Good control — less than four attacks per year, no underlying conditions, over age 60:
- 150 – 175%

### Chronic condition requiring treatment, age 60 and under:
- 150 – 200%

### Chronic condition requiring treatment, over age 60:
- 200 – 250%

### Requirements:
- APS

### Helpful:
- Age at diagnosis
- Symptoms experienced
- Frequency and severity of symptoms
- Tests conducted
- Family history of Coronary Artery Disease, valvular disease, or stroke
- Medications, dosages and related treatments prescribed
- Compliance with the above
- Modifications to lifestyle or daily activities
- Date and results of last medical follow-up
**Bariatric Surgery**
Bariatric surgery alters the stomach, intestine, or both to produce weight loss. Bariatric Surgery is sometimes referred to as Stomach Stapling.

- **Weight before surgery**
- **Reason for surgery** (restrictive or malabsorptive)
- **Any other conditions** (such as diabetes, hypertension, heart disease)
- **Any complication during or after the surgery**
- **Weight loss after surgery**

**Ratings dependent on:**
- **Type of surgery**
- **Severity**
- **Treatment**
- **Weight pre and post treatment**

**Restrictive Surgery up to three years post:**
- 150% - 175%

**Malabsorptive surgery less than one year post:**
- Postpone

**One to five years post:**
- 200%

**More than five years post:**
- Standard to 150%

Either surgery, more than 10 years post, stable weight, no complications:
- Standard

**Required:**
- APS
- Paramedical

**Helpful:**
- Type of surgery
- Date of surgery
- Complications during or after surgery
- Weight before surgery and present weight
- Date and results of last medical follow-up

**Barrett’s Esophagus**
Barrett’s esophagus is a metaplastic change of the mucosal cells lining the lower esophagus due to injury, often caused by chronic reflux of stomach acid into the esophagus.

- **Current age**
- **Testing completed** (endoscopy, biopsy)
- **Current condition**

**Ratings dependent on:**
- **Severity**
- **Treatment**

**Required:**
- APS

**Helpful:**
- Contact information including full name, address and telephone numbers for medical professionals involved in diagnosis and treatment
- Date and results of last medical follow-up or tests

**Blood Pressure**
Refer to Hypertension

**Bypass Surgery**
Refer to Coronary Artery Disease (CAD)

**Cancer: Basal Cell Carcinoma**
Basal cell carcinoma is a cancer that originates in cells of the outer layer of skin (epidermis). It very rarely spreads.

- **Age at diagnosis and current age**
- **Type of cancer and staging**
- **Type of treatment and date completed**
- **Any recurrence or secondary cancer**
- **Any serious complications from treatment**

**Ratings dependent on:**
- **Number of occurrences**
- **Severity**

**Initial occurrence:**
- Typically standard provided it was excised completely and without recurrence

**Recurrences:**
- Dependent on severity

**Helpful:**
- Date of diagnosis
- Date of removal or treatment
- History of other skin lesions
- Date and results of last medical follow-up
### Cancer: Breast

Breast cancer is the second most common cancer among women after skin cancer and, of cancers, is the second most common cause of death among women after lung cancer.

**Important Factors**
- Age at diagnosis and current age
- Type of cancer and staging
- Type of treatment and date completed
- Any recurrence or secondary cancer
- Any serious complications from treatment

**Likely Decision**
Ratings dependent on:
- Age at diagnosis
- Staging of the disease
- Prescribed treatment

Trial applications suggested.

**Condition Descriptions**

**All other types and staging:**
- Postpone for two years or more

**Underwriting Information Requirements**

**Required:**
- APS

**Helpful:**
- Date of diagnosis
- Type and stage of breast cancer
- Any node involvement?
- Contact information including full name, address and telephone numbers for medical professionals involved in diagnosis and treatment
- Medications, dosages and related treatments prescribed, with start and end dates
- Date and results of last medical follow-up

**Carcinoma in situ** (non-invasive) has lower ratings and can be considered after treatment is complete.

**Applications considered if:**
- All treatment is completed
- Applicant does not smoke
- No recurrence

Trial applications suggested.

**Low-grade cancers with:**
- Negative nodes are considered following postponement of three months
- Positive nodes are considered following postponement of five years

**Any form of metastasis:**
- Decline

---

### Cancer: Leukemia

Leukemias are malignant cancers of blood cells which can be chronic or acute.

**Important Factors**
- Age at diagnosis and current age
- Type of leukemia and staging
- Type of treatment and date completed
- Any recurrence or secondary cancer
- Any serious complications from treatment

**Likely Decision**
Ratings dependent on:
- Type
- Staging

A preliminary inquiry may be warranted to determine if we can accept an application.

**Condition Descriptions**

**Applications considered if:**
- All treatment is completed
- Applicant does not smoke
- No recurrence

Trial applications suggested.

**Low-grade cancers with:**
- Negative nodes are considered following postponement of three months
- Positive nodes are considered following postponement of five years

**Any form of metastasis:**
- Decline

**Underwriting Information Requirements**

**Required:**
- APS

**Helpful:**
- Date of diagnosis
- Type and stage of leukemia
- Contact information including full name, address and telephone numbers for medical professionals involved in diagnosis and treatment
- Medications, dosages and related treatments prescribed, with start and end dates
- Date and results of last medical follow-up

---

### Cancer: Lung

Lung cancer is the leading cause of cancer death in both men and women. It occurs most commonly between the ages of 45 and 70. There is a strong association between lung cancer and smoking.

**Important Factors**
- Age at diagnosis and current age
- Type and stage of lung cancer
- Type of treatment
- Any recurrence or spread to other organs
- Any serious complications from treatment

**Likely Decision**
Applications considered if:
- All treatment is completed
- Applicant does not smoke
- No recurrence

Trial applications suggested.

**Condition Descriptions**

**Low-grade cancers with:**
- Negative nodes are considered following postponement of three months
- Positive nodes are considered following postponement of five years

**Any form of metastasis:**
- Decline

**Underwriting Information Requirements**

**Required:**
- APS

**Helpful:**
- Date of diagnosis
- Type, stage and pathology of the cancer
- Medications, dosages and related treatments prescribed, with start and end dates
- Contact information including full name, address and telephone numbers for medical professionals involved in diagnosis and treatment
- Smoking status, past and present
- Date and results of last medical follow-up

| Coronary Artery Disease (CAD) | • Age at diagnosis and current age  
• Severity, number of vessels involved  
• Any residual problems, current status  
• Treatment, surgery, medications  
• Smoking Status  
• Comorbid factors, e.g. Hypertension, Diabetes | Ratings dependent on:  
• Age (higher ratings for younger applicants)  
• Severity of disease  
Within six months of diagnosis:  
• Not considered  
Under age 40:  
• Likely decline  
Range:  
• 200% to decline | Required:  
• APS  
Helpful:  
• Contact information including full name, address and telephone numbers for medical professionals involved in diagnosis and treatment  
• Medications, dosages and related treatments prescribed, with start and end dates  
• Impact on activities and lifestyle  
• Date and results of last cardiac consultation |
| Crohn’s Disease | • Age at diagnosis and current age  
• Severity of the last episode  
• Any hospitalizations or surgery | Ratings dependent on:  
• Age (higher ratings for younger applicants)  
• Severity of disease  
Diagnosed under one year ago:  
• Postpone  
Range:  
• Standard (for remission over five years), to decline | Required:  
• APS  
Helpful:  
• Weight stability  
• Contact information including full name, address and telephone numbers for medical professionals involved in diagnosis and treatment  
• Medications, dosages and related treatments prescribed, with start and end dates  
• Details and results of related surgeries  
• Date of and results of last colonoscopy and/or medical follow-up |
| Depression | • Age at diagnosis and current age  
• Severity  
• Any hospital treatment, or treatment in any other medical facility  
• Any suicide attempt or suicidal thoughts  
• Type of treatment including number and type of medication(s)  
• Any loss of work  
• Illegal drug use | Ratings dependent on:  
• Age  
• Current status and severity of the depression  
• Cause of the depression e.g. situational  
• Lifestyle  
• Support system  
• Loss of work  
Range:  
• Standard (for good control of symptoms) to decline  
Favourable factors:  
• No missed work or hospitalizations within the last five years  
• No social drug use  
• No suicide attempts or thoughts  
• Good followup with medical professionals  
• Good response to treatment | Required:  
• Nervous Disorder Questionnaire  
• APS  
Helpful:  
• Type and cause of the Depression  
• Date of diagnosis  
• Frequency of episodes  
• Contact information including full name, address and telephone numbers for medical professionals involved in diagnosis and treatment  
• Medications, dosages and other treatments prescribed, with start and end dates  
• Impact on activities and lifestyle  
• Personal assessment of current control of symptoms, with or without medication  
• Date and results of last follow-up |
### Medical Risks

#### Diabetes

Diabetes is a metabolic disorder caused by inadequate production or use of insulin.

- **Type 1 Diabetes (IDDM)** requires insulin and is generally diagnosed at a young age.
- **Type 2 Diabetes (NIDDM)** is generally diagnosed later in life and is also referred to as Adult onset diabetes. Treatment is either oral medication or it can be controlled by diet and exercise.

**Gestational diabetes** occurs during pregnancy.

#### Emphysema

Refer to **Chronic Obstructive Pulmonary Disease (COPD)**

#### Epilepsy/Seizures

Epilepsy is a broad term for a number of types of seizure disorders. Partial (Focal) Seizures, Generalized Epilepsy, generalized seizures.

#### Family History

Any family history of Polycystic Kidney Disease, Huntington’s Disease, Motor Neuron Disease, colon and breast cancer in first degree relatives (including children) can be recognized as a concern for underwriting purposes.

</tbody>
</table>
## Myocardial Infarction/MI/Heart Attack/Coronary Thrombosis

Permanent damage of a portion of the heart muscle due to inadequate oxygen supply and coronary blood flow.

**Important Factors**
- Age at diagnosis and current age
- Severity of the attack/disease and how many vessels involved
- Type of treatment
- Medications and dosages prescribed
- Smoking status
- Extent of any residual effects or permanent damage
- Any additional health risks

**Likely Decision**
Ratings dependent on:
- Age at onset
- Cause
- Severity

Trial application suggested. Within six months of episode/attack including date of treatment:
- Not considered

**Unfavourable Factors:**
- Smoking status
- Comorbid factors
- Recent episodes
- Younger applicants (age 40 and under, likely decline)

**Underwriting Information Requirements**
- Required:
  - APS with full cardiac history

- Helpful:
  - Dates and number of attacks, and number of vessels involved
  - Contact information including full name, address and telephone numbers for medical professionals involved in diagnosis and treatment
  - Medications, dosages and other treatments prescribed, with start and end dates
  - Details of related hospitalizations or emergency room visits
  - Date and results of last cardiac consultation

**Medicare Age Applicants**
Applicants age 65 and older may require some additional underwriting specific to their age.

**Important Factors**
- Current age
- Employment status
- Smoking status with regard to any health risks
- Family support
- History of falls/accidents
- Use and type medication(s)
- Regularity of medical check-ups

**Likely Decision**
Ratings dependent on:
- Applicant’s health and lifestyle
- Any adverse health risks

**Underwriting Information Requirements**
- Required:
  - Age and amount requirements as per plan and face amount
  - Possible APS

- Helpful:
  - Frequency of activity
  - Frequency of medical checkups
  - Date and results of last medical check-up

## Seizures

Refer to Epilepsy/Seizures

## Stroke

A stroke is an interruption of the blood supply to any part of the brain causing permanent damage. It can be caused by a haemorrhage, vascular event, or thrombosis.

**Important Factors**
- Current age and age at onset
- Number of events/episodes
- Type of treatment/medication
- Smoking status
- Extent of any residual affect or neurological deficit
- Any additional health risks

**Likely Decision**
Ratings dependent on:
- Age at onset
- Cause
- Type

Within one year of episode of stroke:
- Postpone

**Unfavourable Factors:**
- Younger applicants
- Recent episodes
- Smoking status
- Other health risks e.g. Diabetes, Hypertension

**Underwriting Information Requirements**
- Required:
  - APS

- Helpful:
  - Dates and cause of each episode
  - Contact information including full name, address and telephone numbers for medical professionals involved in diagnosis and treatment
  - Medications, dosages and other treatments prescribed, with dates
  - Details of related hospitalizations or emergency room visits
  - Time off from work related to this condition
  - Impact on activities and lifestyle
  - Date and results of last medical follow-up

## Aviation, Commercial
These pilots include those participating or working in passenger and freight carriers within North America, crop dusting, bush pilots, charters, photography, flight instructors etc.

- Type of flying and hours in-flight
- Total hours as a pilot with special flying accreditations
- Type of aircraft flown and destinations
- Expected flight hours in next 12 - 24 months

Ratings dependent on:
- Type of specialized flying
- Experience as a pilot including hours per year in flight

Range:
- Standard rates up to $10.00 extra per thousand

Unfavourable factors:
- Any health risks

Note:
- Special exclusion clauses generally not available

**Required:**
- Aviation Questionnaire

**Helpful:**
- Aviation license(s) held
- Type and frequency of specialized flying
- Total experience as pilot in logged hours per year
- Any accidents?

---

## Aviation, Private
These are non-professional pilots who generally fly for business and/or pleasure.

- Type of flying and hours in-flight
- Total hours as a pilot with special flying accreditations
- Type of aircraft flown and destinations
- Expected flight hours in next 12 - 24 months

Ratings dependent on:
- Age
- Flying experience (in hours)

- Less than 100 hours logged or under age 26 or student pilots:
  - $3.50 x five years (in most cases)

- Over age 26, in excess of 100 hours logged, expected flying time in next 12 months under 200 hours:
  - Considered at Standard rates

Note:
- Special exclusion clause may be available

**Required:**
- Aviation Questionnaire

**Helpful:**
- Aviation license(s) held
- Type and frequency of specialized flying
- Total experience as pilot in logged hours per year
- Any accidents?

---

## Aviation, Sport
This includes recreational flying/sports such as hang gliding, parasailing, ultralights, parachuting etc.

- Current age
- Type of flying
- Flying destinations
- Amateur or professional status
- Medical and lifestyle history

Ratings dependent on:
- Type of activity
- Frequency
- Destination

Email inquiry suggested.

Notes:
- Special exclusion clause may be available
- Ratings may vary according to participation

**Required:**
- Aviation or Parachuting Questionnaire as applicable

**Helpful:**
- Aviation license(s) held
- Type and frequency of aviation sport
- Total experience as a pilot in logged hours per year
- Member of a specialized flying club?
- Any accidents?
- Type of aircraft including if home built

• Amateur/recreational or professional status?  
• Average dive depth  
• Frequency and location of dives |

Exclusions are not available if the avocations are part of occupational duties.

## OTHER GUIDES

Click on links below to access these other guides.

- Evidence of insurability schedule
- Financial underwriting guidelines
- Recent immigrant and temporary resident underwriting guidelines
To be considered a non-smoker, the insured must not have used any cigarettes, pipe or chewing tobacco, smoking cessation products, or tobacco substitutes within the past 12 months. Up to one cigar/cigarillo is permitted per month, subject to a negative cotinine level. Clients who use marijuana, whether inhaled or ingested, may qualify for non-smoker rates (Class 3).

**Preferred underwriting is available for face amounts greater than $1,000,000:**

**Class 1 – Preferred Plus Non-Smoker**
- The life insured is a very healthy non-smoker (no smoking or cessation aids within the past 24 months) with an excellent family medical history.

**Class 2 – Preferred Non-Smoker**
- The life insured is in good health, a non-smoker (no smoking or cessation aids within the past 12 months) with good family medical history.

**Class 3 – Non-Smoker**
- The life insured is a healthy non-smoker (no smoking or cessation aids within the last 12 months). Up to one cigar or cigarillo/month is permitted, subject to a negative cotinine test. Clients who use marijuana, whether inhaled or ingested, may qualify for non-smoker rates.

**Class 4 – Preferred Smoker**
- The life insured is in good health and smokes cigarettes or uses nicotine-based products. Evaluated with similar health criteria as Class 2 Preferred Non-Smoker.

**Class 5 – Smoker**
- The life insured is healthy and smokes cigarettes or uses nicotine-based products.

*(See Preferred Underwriting Classifications #1345 for more details.)*
STOP SMOKING INCENTIVE PROGRAM

Equitable Life’s Stop Smoking Incentive Program is applicable to:

- Equation Generation IV
- Equimax
- Term Plans and Riders

The program is not available with:

- EquiLiving
- EquiLiving CI Riders

How it works

Should your client quit smoking for 12 consecutive months within the first two policy years, Equitable Life will refund the difference between what they paid as a smoker and what they would have paid as a non-smoker for a maximum one month period. Eligibility is subject to certain conditions including a negative cotinine level, and evidence of continued insurability.

Term clients may be eligible to move from a Class 4 Preferred Smoker or Class 5 Smoker to a Class 3 Non-Smoker.

QUESTIONS?

For more information, contact your Equitable Life Regional Sales Manager.

While Equitable Life has made every effort to ensure the accuracy of the information presented here, the policy contract governs in all cases.
Works for me.

Canadians have turned to Equitable Life since 1920 to protect what matters most. We work with you to offer solutions that provide good value, and help you navigate those solutions to meet the needs of your clients.

Equitable Life is not your typical financial services company. We have the knowledge, experience and ability to find solutions that work for you. We’re friendly, caring and interested in helping. And we’re owned by our participating policyholders, not shareholders, allowing us to focus on your needs and providing you with personalized service, financial protection and peace of mind.
